Magic items

The live treasury: 430 item designs as 711 named items in play, the slot rules, spell items, temper items and the 22 Legendary relics

Kingdoms Call reference sheet. Data file v2026.10.15-1202. Generated 2026-10-19 from the repository (branch at that date). Numbers are what the engine uses today, read straight from its tables; where a figure comes from the rulebook text instead, the section says so.

Items are won from lairs, looted and stolen. They come in four tiers named for the guardians that keep them. The data file holds the designs; when the engine loads it sorts them into tiers by role and score (a combat item is never Weak), gives many a second name, and mints further named copies of a design until every tier and kind holds its quota (711 names in play from 430 distinct effects). Every name is unique in the world; the same effect can exist under two or three names. Slot items give their power only when equipped; everything else is always active.

What to look for when reviewing

- Is each tier's kit a clear step up (+1 and +2 weapons at Moderate, +3 at Powerful, +4 relics)?
- The spread of kinds per tier (counts below) and which effects dominate.
- The score column: the engine's 0–10 estimate of an item's worth, which decides its tier (Powerful takes nothing under 4.5, Moderate nothing under 2).
- Race- and alignment-only items: who gets what.
- Whether the 22 relics are each "a thing no other item can do".

Where this comes from

- Data file: ALL_MAGIC_ITEMS_P (the designs), LEGENDARY_ITEMS_P, _ITEM_NAME_ALTS, _VARIANT_BANK, KC_ITEM_SLOT_CAP, KC_ITEM_UNCAPPED_SKILLS. Engine: items/equipment.js (roles, scores, tier targets, minting), items/tiers-and-hoards.js. The lists here are read after the engine has loaded, so they are what a game stocks.
- Rulebook: Magic items. Rulings R-011, R-049, R-050, R-051, R-052.

Rules

Rule	What it is
Slots	One each of weapon, armour, shield, cloak, helm, amulet; two rings; two combat items. Only equipped slot items give their power. A character auto-equips the first item held per slot; Equip Items chooses.
Always active	Items with no slot (horns, banners, ledgers, tomes, trinkets) work from the pack.
Combat items	Potions, scrolls and devices: equipped in a combat slot, used once per fight when the moment calls (a potion when hurt, holy water against undead), never consumed; each use takes the round's action. One name each, never minted.
Skill items	Count past a trained 5, to 9, only for Melee, Archery and the five schools (schools: cast chance only). Druid counts every level. Every other skill stops at an effective 5.
Spell items	Use Item casts the named action spell at a flat 95%, no skill, no casting slot, as at least a level-3 cast. Two names per core action spell; none for mastery spells.
Tiers by role	Weak lairs hold only utility kit (nothing that helps in a fight); Moderate the first rung of combat kit; Powerful the second; Legendary the relics (R-051). The engine scores every design and places it; a short band is topped up by minting named copies of the designs already in it.
Tax items	All bonus tax gold together is capped at 5% of the realm's base tax (R-050).
Relics	Each Legendary relic held at the Reckoning is worth 1 point. Never stolen from a lair; can be stolen from a carrier.
Charmed heroes	A charmed hero handles no items (R-049). Cowardly mercy hands the victor one random item.
Mithril	A Dwarven realm's dwarves are born with it; never found, never scored, never traded.

Sword of the First Emperor	weapon	12	Melee +4	The blade that founded the old Empire, and has not been drawn in anger since the last Emperor fell. Melee counts 4 levels higher.
Dawnbreaker	weapon	11.4	Melee +3, and +2 damage on every melee hit.	A greatsword that takes the colour of the first light, whoever holds it and whatever the hour. Melee counts 3 levels higher and every melee hit deals 2 extra damage.
Aegis of the Sundered Host	armour	11.2	Armour: melee blows deal 4 less, +8% to hit, +2 damage per melee hit, and foes -8% to hit you.	Plate recovered from the field where an army died to the last shield. Melee blows on you deal 4 less; you strike at +8% to hit for 2 extra damage, and the foe fights at -8% to hit.
Carapace of the World-Serpent	armour	12	Max HP +10, recover 3 HP each round, and foes -6% to hit you.	Scale from the serpent that is said to ring the world, still faintly warm. Maximum HP +10, 3 HP recovered at the start of every round, and the foe fights at -6% to hit.
Bulwark of the Last Dawn	shield	12	Shield: 50% to block any missile outright, +12% to hit, +3 damage per melee hit, foes -10% to hit you.	The shield that held the eastern gate through one night the chronicles will not describe. 50% chance any arrow or missile is stopped outright; you fight at +12% to hit for 3 extra damage, and the foe at -10%.
Mirror of the Drowned Moon	shield	12	Shield: 50% to turn aside any hostile spell or power, +3 damage per melee hit, +8% to hit, foes -10% to hit you.	A disc of black glass hauled from a lake that has no bottom. 50% chance a hostile spell or guardian power is turned aside entirely; every melee hit you land deals 3 extra, you strike at +8% to hit, and the foe fights at -10%.
Crown of Command	helm	3	All characters in the same province gain +1 to all skills for the duration	The iron crown of a king nobody now names, whose word could not be disobeyed. Every character standing with you fights and works one level better in every skill.
Imperial Regalia	helm	12	+10g collected each tax season (item tax gold is capped at 5% of your realm's base tax income)	The crown, orb and sceptre of the vanished throne; the provinces still pay when they see them. +10 gold each tax season.
Cloak of Many Faces	cloak	3	This hero may not be targeted by Spy, Psychic Blast, Curse or Encounter orders	Nobody who has worn it agrees on its colour, and nobody who has hunted its wearer has found the same face twice. No Spy, Psychic Blast, Curse or Encounter order may name you.
Nightfall Mantle	cloak	12	Cloak: foes -35% to hit you, a further -12% aura, and +16% to your own attacks.	Woven the hour the sun failed, and it has never quite let the light back in. Enemies strike at -35% to hit you, fight at a further -12%, and you attack at +16% to hit.
Band of the Ninefold Path	ring	12	Max HP +8, recover 2 HP each round, +10% to hit, foes -8% to hit you.	Nine bands of nine metals, forged by nine smiths who never met. Maximum HP +8, 2 HP a round, +10% to hit, and the foe at -8%.
Signet of the Sleepless Crown	ring	11.1	Ring: never stunned, entranced or knocked back; +3 damage per melee hit, +10% to hit, foes -8%.	The seal of a king who is said never to have closed his eyes. No stun, entrancement, paralysis or knockback takes hold; you hit at +10% for 3 extra damage, and the foe at -8%.
Heartstone of the Deep Vigil	amulet	12	Max HP +10, immune to burns, poisons and bleeding, foes -8% to hit you.	A stone cut from the floor of a shrine that was watched, unbroken, for four hundred years. Maximum HP +10, no burn, poison or bleed ever takes hold, and the foe fights at -8% to hit.
Pendant of the Ten Thousand Eyes	amulet	11.5	Amulet: once per fight recover 35% of max HP when nearly spent; +16% to hit throughout.	Every facet holds a watcher, and between them they miss nothing - least of all the moment you are about to fall. Once per fight, driven near defeat, you recover 35% of your maximum HP; you fight at +16% to hit.
Vial of the Riven Sky	combat	12	Combat use: 26-36 damage and the foe loses their next action.	A finger of the storm that split the sky over the Broken Field, stoppered while it was still screaming. 26-36 damage, and the foe loses an action.
Draught of the Undying	combat	11.4	Combat use: recover 26 HP and shed every poison, burn and blinding.	Drawn from a well that the dying were once carried a hundred miles to reach. Recover 26 HP, and every affliction on you lifts at once.
Crystal Orb	trinket	3	Spy always succeeds - no roll needed	It shows the watcher what they came to see, and does not ask whether they should see it. Every Spy order you give succeeds without a roll.
Battle Standard	trinket	12	All armies led: strength +4 each	A standard that has never touched the ground, through three dynasties and one long defeat. Every army you lead fights at +4 strength.
Kraken Figurehead	trinket	3	All fleets you lead fight as if one experience level higher	Carved from something that was pulled up dead and did not stay that way. Every fleet you lead fights one experience level above its own.
Wailing Phylactery	trinket	3	Necromancy spells always succeed first cast per turn	The screaming inside it has not stopped since the night it was filled. Your realm's first Necromancy spell each turn cannot fail.
Philosopher's Stone	trinket	3	Once per game: instantly promote all armies one quality tier	Small, dull and warm, and worth more than any province. Once in the whole game, every army of your realm is promoted one experience level on the instant.

Relic	Kind	Score	What it does	Lore
Standard of the Nine Legions	trinket	12	All armies you lead: strength +6 each	The war-banner under which the Empire was won, and under which it was lost exactly once. Every army you lead fights at +6 strength.

Gaps, questions and things to check

These are observations from reading the data files, the engine and the rulebook together. None of them is a ruling. Each is a question for Toby or a place where two sources disagree.

#	Observation
1	The data file's own "tier" field is not the live tier: the engine re-sorts every design by role and score at load (288 Weak, 293 Moderate, 108 Powerful names in play, against the tier targets 288 / 293 / 108). Anyone editing an item should check where the scorer puts it, not where the file lists it.
2	Minted copies: 144 names in play are minted variants of a design (marked _variantOf) and 137 more are second names from the alternates bank, so a hero can find the same effect under two or three names in one game. "Every item is unique" holds by name; R-052 only keeps the same effect out of lairs within three provinces.
3	Weak lairs hold the first six to eight finds of a hero, all field kit by design (R-051). Playtesters should say whether the first fighting item arrives soon enough.
4	Trinkets and other no-slot items are 95 of the 430 distinct effects; nothing limits how many always-active items a hero stacks except the 5% tax cap.
5	Combat items (82, one name each): used automatically "when the moment calls". Two combat slots is the only limit, so a hero with many potions must choose which two.
6	Race-only items: Human 8, Elven 7, Dwarven 6, Orcish 5. Alignment-only items: Neutral 5, Evil 4, Druidic 4, Good 3, Divine 3, Pagan 3, Undead 3. Uneven, and most are Weak-tier.

#	Observation
7	Spell items exist for most action spells; see the Spells sheet summary for the action spells with none.
8	Six relics are marked _unscorable (placed by hand). Any new item should be scored (equipment.js) before it is added, to see which tier it lands in.
