# Sage discoveries

All 296 discoveries by field, with the Heritage and Creed fields each realm can research

Kingdoms Call reference sheet. Data file v2026.10.15-1202. Generated 2026-10-19 from the repository (branch at that date). Numbers are what the engine uses today, read straight from its tables; where a figure comes from the rulebook text instead, the section says so.

Research (Sage 1+) is the only way to make a discovery: a permanent, realm-wide upgrade. There are 296, every effect unique, each tuned to be worth about 1.5 gold a turn to an engaged player (R-026). The open fields are Military, Economy, Espionage, Scholarship, Heroic and Special; each race has a Heritage field and each creed a Creed field only it can research.

### What to look for when reviewing

- Are the fields of comparable size and worth? Military 20, Economy 16, Scholarship 16, Espionage 10, Heroic 10, Special 4, and 20 in every Heritage and Creed field.
- Whether any discovery still refers to a rule that has since changed (Deep Roots, R-104).
- The R-026 open question: most income discoveries pay +1g a turn; is that the feel wanted?
- A realm can research 20 Heritage + 20 Creed + 76 open = 116 discoveries at most.

### Where this comes from

- Data file: SAGE_DISCOVERIES_P (ids sd30 and sd34 retired, never reused; descriptions generated from the effect rows). Engine: discoveries.js, research-and-practice-orders.
- Rulebook: Sage discoveries; the Sage skill; Research order. Rulings R-012, R-026, R-037, R-059.

## How research works

| Rule | What it is |
|---|---|
| **Chance** | 5% per Sage level counted to 5 (25% at Sage 5); Neutral realms 10% a level; the Loreseeker minor title +5%; the Grand Library Wonder guarantees one a turn; Sage 7 Research Breakthrough guarantees one. |
| **Choice of two** | A success brings two discoveries from the chosen field; keep one with your next orders, the other is lost to your realm for good (unchosen, one is kept at random). The kept one works from the next turn (R-012). |
| **Fields** | Choose a field with the order; an exhausted field cannot be chosen; if another scholar empties it earlier the same turn the Research turns to a random other field (R-037). |
| **Unlooked-for find** | Rolled first, a long shot not raised by Sage, from a field you cannot ask for; it replaces the ordinary find that season. |
| **Perseverance** | Every failed Research ×1.2 on the character's next this turn. |
| **Spies** | Spying a rival's capital can copy one of their discoveries at 10% + 10% per Spy level (never a Heritage or Creed their realm could not use). The Loremaster copies one free each turn. |
| **Mastery** | Sage 6: +5 gold per discovery made. Sage 8: each discovery raises the tax base of the province the scholar stands in by +1 (max 10) (R-059). |
| **Experience** | A discovery is Sage experience; a fruitless season or using an item a small chance. |

## Gaps, questions and things to check

These are observations from reading the data files, the engine and the rulebook together. None of them is a ruling. Each is a question for Toby or a place where two sources disagree.

| # | Observation |
|---|---|
| **1** | R-026 open: most income discoveries pay +1g a turn. Lowering the gold weighting lifts most to +2g. |
| **2** | R-104 open: Deep Roots (Druidic) lost half its effect when Awaken the Wild was removed. |

| # | Observation |
|---|---|
| **3** | unitStr is the main effect of 66 discoveries; stacked discovery strength on a unit is capped at ×1.30 (R-026), so a Military-heavy realm hits the cap after a few. Say whether the cap is per unit or per realm in the rulebook. |
| **4** | The open fields differ in size (Military 20, Espionage 10, Special 4). With a choice of two per success, a 10-discovery field is exhausted in five successes. |
| **5** | The Special field (4) is the unlooked-for finds; the rulebook calls them a long shot but gives no figure. |
| **6** | Descriptions are generated from the effect rows by a tool (t/gen.js, not in this repo). Hand edits to a description will be lost if it is rerun; the effect row is the truth. |
| **7** | Discovery names that sound like orders or units (War Drums, Silent Scouts) can be confused with the unit abilities and items of the same flavour; a style pass could help. |
